

Answers and next inputs

Your answers are recorded. Remaining blanks are for evidence or unresolved details.

Confirmed: Billeaford Hall, Sloe Lane, Knodishall, IP17 1UU. Private household garage. 9 x 6 m, entrance east, three equal bays, left bay enclosed with a full dividing wall, two open bays. Red clay pantiles; natural timber/doors; end framing concealed. Illustration accepted. Three brick courses preferred, adjustable if needed for a low building. General-builder route; no specific vehicle checks. Exact roof height remains to be resolved.

PROMISED FILES - STILL TO BE RECEIVED

- 1 New licensed map: original file, scale, north/grid, date and licence details. Only the old screenshot is available.
- 2 Building identities and boundary/access annotations (page 2); garage and driveway sketches (page 3).
- 3 Photographs of all four sides of the existing garage; uncropped drawings if available.
- 4 Measured ties, boundary distances and levels (pages 4-6). Give units, endpoints, date and evidence.

New map filename/location, date and licence information (when available):

Pages 2-3 are rough mark-up sheets. Photos/scans of your answers are fine for communication; they will not become scaled submission plans. Keep original source files separately.

Existing site and ownership

REFERENCE SCREENSHOT - NOT TO SCALE. Use to mark identities and intent only.

Label the buildings B1-B7 (key on page 4), mark the garage and entrance, and identify land owned/controlled, shared access and the highway connection. Note uncertainty explicitly.

User-supplied reference screenshot. Original mapping, date, north and reuse rights still to verify. Do not measure from this page or submit it as an application plan.

Proposed garage and driveway

REFERENCE SCREENSHOT - NOT TO SCALE. Use to mark identities and intent only.

Sketch the agreed 9 x 6 m footprint, entrance facing east. Draw new/retained/removed drive edges; mark the right-side limit, left fence and trees. Give ties on page 4; verify map north.

User-supplied reference screenshot. Original mapping, date, north and reuse rights still to verify. Do not measure from this page or submit it as an application plan.

Building key and site ties

Place these IDs on the reference pages. IDs do not assign positions in advance.

ID / requested name	Confirm identity, use and any different name
B1 - Billeaford Hall	
B2 - Former dairy	
B3 - Timber garage	
B4 - East Barn	
B5 - West Barn	
B6 - Other barn/store	
B7 - Other barn/store	

MEASURED SITE DISTANCES

Use metres. Name both endpoints. Include garage-to-building ties, nearest curtilage-boundary distances (including roof projections), available width/depth and a cross-check.

ID / endpoints	Value + unit	Method / date / evidence

Verified map north and ground-level datum (entrance faces east):

Verify the buildings

Existing values below are reference values, not surveyed dimensions. Use millimetres.

Existing garage	Reference	Measured value / evidence
Wall footprint	6800 x 3500	
Roof length / overhangs	7200 / TBC	
Eaves / ridge	2200 / 3800	
Door clear width / height	TBC / 2000	
Approach depth / width	1200 / TBC	
Roof covering	Conflicting	

Proposed agreed: 9000 x 6000, equal bays, full partition, entrance east. Clear widths depend on the detailed wall/post arrangement.

Roof/levels to resolve: eligible dual-pitch PD limit 4 m overall / 2.5 m eaves; within 2 m of curtilage boundary, 2.5 m overall. No final ridge selected.

Plinth: prefer three courses; actual height and ground/floor relationship still needed. May reconsider for low-height intent.

Designer/builder: clay tile product/pitch, frame/roof details, overhangs, clear openings and door operation. Do not guess structural sizes.

Four-side photographs promised. Exact siting/levels and PD eligibility remain unverified; planning drawings require further technical design before construction.

Height source: GOV.UK householders technical guidance, Class E (checked 23 Sep 2026).

Driveway, levels and review

Reported fall: about 300-400 mm towards the courtyard centre. Exact extent/levels awaited.

Driveway width, corner/turning dimensions and surface material/colour:

Permeable surface? Edge treatment, falls, drainage features and destination:

Highway entrance changed, or internal drive only? Access rights, gates and constraints:

Trees/hedges: positions, species, trunk/canopy sizes; excavation nearby; retained/removed:

Fall endpoints; corner/perimeter levels with one datum; proposed floor; services/boundaries:

Existing planning decisions/conditions and known heritage/tree/other designations:

REVIEW RECORD

Reviewed by: _____ Date: _____ Still unknown / further files to follow:

Next: check the original map and evidence; agree building identities and boundaries; build the measured base; then review proposed siting/driveway before issuing the drawing set.
